## PROFILE

Experienced Full Stack Engineer with over 6 years in the software development realm, having actively contributed to the success of more than 3 startups. Proficient in both front-end and back-end technologies, I bring expertise in diverse platforms, including Rails, React, Golang, Node.js, and Typescript. My track record reflects a commitment to delivering high-quality, scalable solutions, showcasing adaptability and proficiency in the ever-evolving landscape of technology. I prioritize delivering top-notch products, regardless of the technology used. Quality is my main focus.

## EMPLOYMENT HISTORY

Full Stack Developer (Remote), Caribou Washington, D.C.  
[Contractor]

Feb 2022 — Present

- Played a key role in refactoring, improving a huge legacy code base written in Ruby on Rails
- Adapted new technology (Go Lang) and played a versatile role in creating a robust micro service to overcome an existing latency problem in a core module
- Took the entire responsibility for cutting over a huge module from a legacy system to a new micro service which is based on Typescript, Node.js
- Took sole responsibility for a new feature, from spiking to implementation which improves pre-qualification rate of loan applications in the existing system
- Played an important role in identifying, improving system Observability and Monitoring
- Got a reputation from the Engineering manager as 'Ticket eater', as a resemblance of better performance and productivity
- Entire team worked under a fully automated ci/cd environment based on Docker, Kubernetes
